

2024 PBA Tours – Approved Equipment **August Update**

All Bowling balls used in any PBA Tour event (National, PBA50, Regional or PBA Jr.) must be found in the Registered Product List located here;

<https://www.pba.com/registered-products>

- This will ensure that all balls have been approved and that all urethane-like balls have been manufactured at 78.0+HD hardness. (Quick reference of 2024 balls that fit this description are listed below).
- To access this page, go to PBA.com > Player Resources > Registered Products. Click on the specific bowling ball brand and then look for the name of the ball that is in question. If a bowling ball is not listed on that page, it is not cleared for use on ANY level of PBA tour competition.
- Urethane and urethane-like balls that remain on the Registered Product list have been tested for oil absorption and verified to be a minimum of 78.0+HD hardness. (Quick reference of 2024 balls that fit this description are listed below).

Additionally for the PBA National Tour only:

- All bowling balls must be manufactured on or after August 1, 2022. Any older second shot balls (spare balls) made of plastic or rubber, may be approved for use at spares or as a fill ball by the Tournament Director or Director of Rules and Equipment on case by case basis. An approved list of these “spare balls” will be posted in the paddock.

2024 List of Acceptable Urethane and Urethane-Like Equipment made at 78.0HD+ **Current (8/18/24)**
